

P250 Transport Case

For transporting and storing the PEDIASCAN® and Maxiscan® Transilluminators

Feel confident when storing or transporting your PEDIASCAN® or Maxiscan® transilluminators by utilizing the **P250 Transport Case**. This waterproof, crushproof, lockable, nearly indestructible case will provide a snug fit for your transilluminator, the P101 Lightpipe, the K913 Battery Charger, and a few P136 Sterile Sleeves. This case will protect and store your transilluminator equipment when not in use.

P250 Transport Case Features:

- Watertight - submersible up to 1 meter for 30 minutes
- Crushproof
- Dustproof
- Easy double-throw latches
- Automatic pressure equalization valve
- Stainless Steel padlock tabs
- Customized internal foam for maximum protection

P250 Transport Case Dimensions:

- 16" x 13" x 6.87" (40.6 x 33 x 17.4 cm)
- 6.39 lbs. (2.9 kg)

**Note: the transilluminator units cannot be used while stored in this case. This case is specifically for transportation and storage of the PEDIASCAN® and Maxiscan® Transilluminators.*

Price: Call for pricing and availability.

The P250 Transport cases are a safe, reliable way to protect your PEDIASCAN® or Maxiscan® transilluminator in transport or storage.
